Key benefits:

- Participants selected from as many high schools in New Jersey
- A jumpstart for juniors and seniors to become familiar with these new topics to facilitate their college selection
- Participants can check many books to select as within each topic we set up a group of books to choose from
- Participants to either purchase the books selected or opt for rental option to reduce costs
- Rental charge for one book is \$5 per week, one book to be taken out for one week at a time
- Our advantages to make available at very modest cost - new books, selected rigorously, clusters by topics, to select books within the recommended list, to read one book per week, to summarize, and to earn a certificate

How it works:

- Visit the ESG Bookstore at Princeton and select 3 books each for E, S and G and 1 additional book from any of E, S and G (thus, total 10 books to be selected by the student)
- After paying the purchase price or rental charges for these 10 books, the students can take the books to read
- Besides purchase price of 10 books, participants will have to pay administration fees of \$100
- If opted for rental option, then rental charges of 10 books plus administration fees of the program will be \$100
- We offer two levels:
 - 1) Level One - 12 weeks program February-April, 2025
 - 2) Level Two - The program renewed for May-July, 2025
- As each book is read, summarize the books on a weekly basis in an online form which will be provided
- Each summary will be evaluated as excellent, good, satisfactory and unsatisfactory. If an unsatisfactory grade is assigned, you will have the opportunity to update the summary
- Once all 10 the books are reviewed, a certificate of completion will be provided with the list of the books reviewed
